VP QUESTION | DO COMPETITORS HAVE BETTER REVIEWS?

Kevin's vs. Competitor Review Performance

Core prepared-beef benchmark | Trend window, full archive, and total-rating context

BOTTOM LINE Competitors outperform Kevin's in the recent dated-review window, but Kevin's remains stronger across the full archive. Recent Kevin's feedback averages 2.73 stars versus 3.32 for competitors, and 55.1% of Kevin's reviews are 1-2 stars versus 38.1% for competitors.

55.1% KEVIN'S RECENT 1-2 STAR SHARE 136 of 247 dated reviews	+16.9 pts LOW-STAR GAP VS. COMPETITORS Competitors are lower at 38.1%	-0.59 RECENT RATING GAP 2.73 Kevin's vs. 3.32 competitors
---	--	--

Comparison across the requested evidence views

Written reviews: trend Kevin's n=247 / 7 products; competitors n=118 / 6. Full archive Kevin's n=638 / 8; competitors n=192 / 6. *Observed ratings aggregate 1,377 ratings across 14 Kevin's source pages and 29,991 across 9 competitor pages; they are not unique or date-windowed.

Executive interpretation

RECENT PERFORMANCE Competitors lead on both measures: +0.59 stars and 16.9 points lower 1-2-star share. Equal-product weighting preserves the direction (+0.24 stars; 11.2 points lower).

FULL ARCHIVE The relationship reverses: Kevin's averages 4.00 versus 3.39, with 24.0% 1-2 stars versus 36.5% for competitors. This reflects Kevin's much stronger historical review base.

TOTAL-RATING CONTEXT All observed source pages slightly favor competitors (4.34 versus 4.26; 10.5% versus 15.3% low-star share), but the result is source-mix sensitive. A one-page-per-product sensitivity favors Kevin's (4.74, 5.3%) over competitors (4.26, 12.9%).

RECOMMENDED VP VIEW Use recent dated written reviews as the primary performance read and track 1-2-star share as the clearest risk KPI. Use the full archive to explain the historical baseline and total ratings only as supporting channel context - not as a substitute for time-aligned review evidence.

Evidence guardrail: Competitor written-review evidence covers six of eight core products and includes complete Hormel first-party histories plus bounded Walmart samples. Rating totals can include syndicated or repeated source-page populations; exact-source labels are retained in the dashboard.
